

Preoperative IV Sedation Instructions

1. You must have a responsible adult to drive you home after the sedation and procedure is performed. You will not be permitted to leave the office alone.
2. Do not have anything to eat or drink for 6 (six) hours prior to the procedure.
3. Wear loose fitting garments, particularly your shirt or blouse.
4. Plan to arrive 15 minutes before the procedure.
5. Should you develop a cold, flu, sore throat, or any other illness, call the office to reschedule the appointment until you are physically fit. Call if any of these symptoms appear.
6. Any drugs you are currently taking should be reported to us before your case so Dr. Daniel can consult with your physician. This is very important so do not forget to advise us of all medicines you are taking.
